

River Height Update #2

Members of the Carpentaria Local Disaster Management Group (LDMG) continue to monitor floodwaters and have undertaken another flyover on Sunday morning.

There is still plenty of water to come and at this stage some minor to moderate flooding may be expected in both Normanton and Karumba.

The LDMG continues to monitor the situation and are undertaking daily inspections of flood waters to enable early warning of any impending river height rises.

The LDMG urges those residents in low lying areas of Normanton and Karumba to be aware of the situation and to take action as necessary.

Please ensure that you share this message with your friends and relatives to ensure that as many of our community members are informed.
