supplementary marine water was not utilised this year

High confidence that demand will be met for the next 18 months. currently in the catchment, there is approximately 12-18 months supply plus forecast rainfall for the upcoming wet season.

There is no forecast population growth of significance that will impact on the water supply network. The weir was recently extended to store more water and expected wet seasons will assist in ensuring water demand is met. use of GAB and marine water if required

reduction by various customers as they are now supplying their own water from dams etc

2022 Carpentaria Shire Council	12877 Normanton Raw-PT	Normanton Raw-Partially Treated Water Scheme	Raw-Partially treated water scheme	QG1.12	WA7	Volume water sourced: all		4.3 ML

Affected customer numbers would be very low. The affected customers would be able to cart water from the treatment plant if required. Funding has been secured to install an emergency intake and increased redundancy to the raw water supply network.
